Admin Email	admin@company.com Admin ID: ab552821-ce46-4b23-9125-82803be528a4
Tech Stack	Node.js · Express.js · Supabase (PostgreSQL + Auth + RLS) · Google Sheets API

Part 1 — Supabase Setup · Part 2 — Database Schema

Created **employee-engagement-backend** on Supabase. Enabled Auth, created admin user. Ran SQL schema — 7 tables with triggers, indexes & foreign keys.

Part 3 — Seed Data · Part 4 — Row Level Security

Seed Data Inserted	RLS Policies
• 1 Company — TechCorp Solutions	• Employee: View own assignments only
• 5 Employees (EMP001 – EMP005)	• Employee: Insert own responses only
• 2 Forms: Monthly Feedback & Quarterly Review	• Employee: View own responses only
• 5 Fields/form (3 Rating + 2 Textarea)	• Admin: Full CRUD on all 7 tables
• 10 Assignments (5 employees × 2 forms)	• RLS enabled on all 7 tables

Part 5 — API Development (Node.js + Express)

REST API with **Express.js** + **Supabase SDK**, running on **port 3000**.

Method	Endpoint	Purpose
GET	/employee/:employeeId/responses	Returns assigned forms + responses for an employee
POST	/form-response	Validate · Insert responses · Update status · Log · Sync to Google Sheets

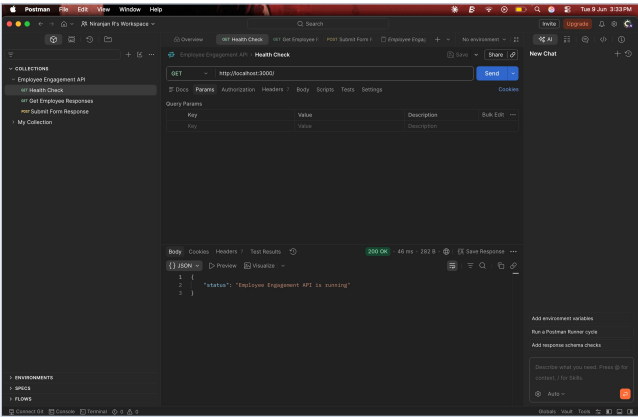

Fig 5 · Health Check GET / · 200 OK

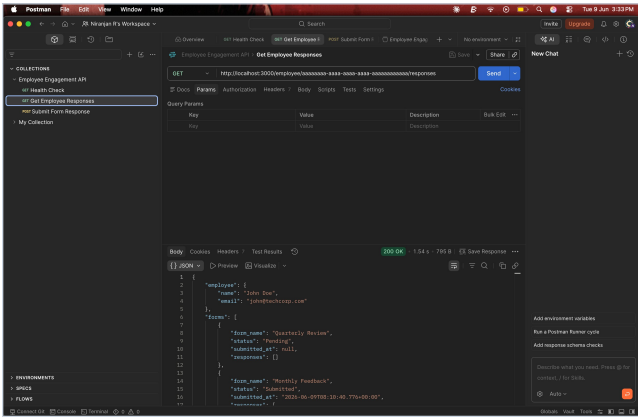

Fig 6 · GET /employee/:id/responses · 200 OK

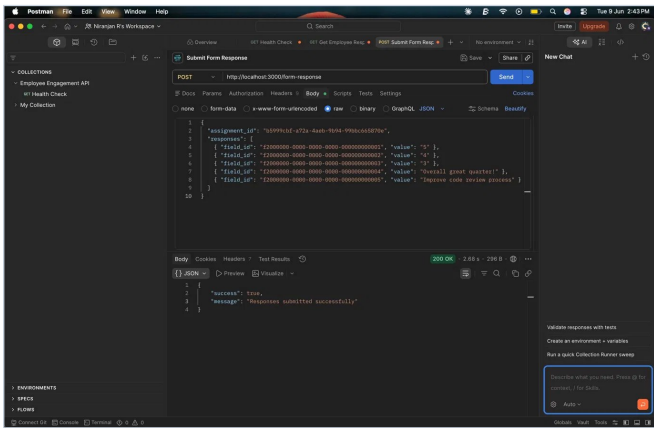

Fig 7 · POST /form-response · 200 OK — Responses submitted successfully

Part 6 — Google Sheets Integration

Every submission appends one row per question-response pair automatically. Two submissions generated **10 rows**.
